

PHS

AUTOMOTIVE SERVICES, INC.

P.O. Box 884 - STERLING HTS. MI 48311

Dear Pontiac Enthusiast:

Thank you for your inquiry concerning the history package on your Pontiac. There are several items that you should be aware of:

1. The microfilm quality is not the best. In those cases where it is difficult to read, we've hand written the data. Additionally, in all cases, the copy attached is the very best we can reproduce.
2. We've attached a copy of the car order form, matching your car, for ease in decoding the manifest or billing history card. Options such as code "382" found on the manifest refer to the same option on the order form (in this case a "382" is the GTO option for 1964/65). Don't try to decode all of options from the manifest, as several codes were used to describe things as "Winter Antifreeze" and are not listed on the order form.
3. One trick is required:

Manifest Code
503

Car Order Form Code
501 - Power Steering
502 Power Brakes

Add the 50(1) and the 50(2) to get 50(3). This applies to all manifests and billing history cards.

(Note: 1969 and newer Pontiacs have their options already decoded, so the above information need not apply.)

We have made every effort to be as thorough as possible in responding to the varied special requests that we have received, in addition to the vin information package on your vehicle. Some of these requests are, unfortunately, impossible to fill or the information requested no longer exists.

Sincerely,

PHS Historic Services

- * Std. rear axle ratio with air conditioning
- # 3.23:1 rear axle standard with air conditioning
- § Code 534 H.D. fan
- @ Code 591 speedometer adapter required
- † Air conditioning not available and denotes special H.D. radiator code 432 required at extra cost.

§ Metallic linings code 692 mandatory with Safe-T-Track limited slip rear, code 701.

† Note: M21 close ratio four speed available only with 3.90 and 4.33 axles. M20 wide ratio four speed available only with 3.08, 3.23, 3.36 and 3.55 ratios.

AXLE IDENTIFICATION:

There are two methods of identifying the axle ratios:

1. The alphabetical code shown in chart is applied to the left rear brake drum facing by means of a sticker.
2. The alphabetical code shown in chart is stamped in the axle housing just to the right of the carrier case and directly below the brake pipe clip.

Differential Ratio	Code	Safe-T-Track Code	
		Std. Code	Track Code
3.08	D	WE	YE
3.23	K	WF	YF
3.36	E	WG	YG
3.55	F	WH	YH

H.D. Metallic Brake Linings were available in the following ratios only

3.08	G	XB	ZB
3.23	L	XF	ZF
3.36	M	XG	ZG
3.55	N	XH	ZH
3.90	P	N/A	ZK
4.33	S	N/A	ZL

TRANSMISSION CODES

Code	Type
S	3 speed manual - floor mounted - H.D. optional
X	3 speed manual - floor mounted
W	4 speed manual - M20 wide ratio
8	4 speed manual - M21 close ratio
9	4 speed manual - M21 close ratio, 3.90 or 4.33 rear axle only
J	Automatic - GTO only
T	Automatic - With air conditioning - GTO only

Engine and Transmission Identification: The factory engine sequence number is stamped on the right hand bank of the engine (left side as you face the front of the car). Directly above the sequence number is stamped the engine code.
